LinkedIn | Portfolio

Full-Stack Developer with a backend-focused profile and over 1 year of experience, specialized in C# and .NET for enterprise services and integrations. Experienced working with Next.js, Node.js, and Express in web application development, as well as relational and NoSQL databases. I contribute to full-stack teams by building maintainable solutions aligned with real business needs. Projects available in Portfolio.

Experience

FEBRUARY 2026 – PRESENT 2026

Full-Stack Developer/A13AGENCY, Santa Marta, Colombia.

- Development of an interactive digital menu SaaS platform for restaurants using Next.js 15, MongoDB, and Prisma ORM; admin panel with CRUD operations, drag & drop, and dynamic content management.
- Implementation of real-time cross-platform communication using Pusher Channels and the BroadcastChannel API.
- Development of a headless CMS with REST API, secure session-based authentication, bilingual support, and integration of AI and speech synthesis.

FEBRUARY 2025 – OCTUBER 2025

Full-Stack Developer/WANTDIGITAL S.A.S, Bogota, Colombia.

- Developed backend solutions for enterprise administrative systems using .NET and ASP.NET Core.
- Implemented workflow automations using n8n and OCR/AI services for structured processing of financial receipt PDFs.
- Extracted, transformed, and persisted data from Google Drive into consolidated Excel reports using SQL Server and Entity Framework Core.

Feactured Project

Estadero Parador Turístico – Management System (In prodution)

- Administrative web application built with ASP.NET Core MVC, Entity Framework Core, and SQL Server (Azure SQL) for managing branches, categories, products, orders, and users, including authentication with ASP.NET Core Identity, role-based access control (Admin / Waiter), and an order workflow module with state transitions and historical price persistence.
- Implemented enterprise-level features including image upload management, AJAX-based dynamic dropdowns, pagination and search, and automated deployment to Azure App Service using GitHub Actions CI/CD, including automatic production database migrations.

Stack

C#, .NET, ASP.NET Core, Entity Framework Core, Node.js, Next.js, React, JavaScript, Prisma, MySQL, MongoDB, Git.
